Make HD Slideshows on Mac With HD Slideshow Maker

Step 1. Import Photos to HD Slideshow

Click **“Add Photos”** to import photos to the software for your Mac computer. You can see the thumbnails of photos imported at the bottom of the screen.

To arrange the photos order, click **“Arrange”** icon, then drag photos to the place where you want to put.

Step2. Add music to slideshow and organize music

A silent slideshow is just like a silent movie. You can add more than one song as background music.

To **“Sync”** icon enables you to sync slideshow time with music time, so they can play in pace with each other.

HD Slideshow Maker enables you to organize songs added. Click the **green music bar** at the bottom, then you can see **“The list of background music”** window. Use correct buttons to play music, add or delete songs and arrange song order.

Step 3. Choose a slideshow theme

Click **“Theme”** to choose a theme for your slideshow. The software provides kinds of themes for choosing. Also you can customize a theme with a beautiful image. The theme will make your slideshow eye-catching.

Step 4. Change transitions effects

Once photos are imported, they will be applied random transitions. However, you can change them by clicking the **transition** icon between photos (like dice). Among all the transitions, what most fascinating transitions are the 3 D transitions.

Step 5. Set time duration for slides and transition

Make sure HD slideshow Maker is the current running app, click HD slideshow Maker from the top of your screen(next to Apple icon) and select **“Preference”**, in the Options window, you can set time for photos and transitions. Tick the **“Repeat slideshow at the end”** to loop the slideshow.

In the Output settings area, you can locate the slideshow’s path and choose video’s format from **MP4** or **MOV**.

Step 6. Play the slideshow

Before exporting the slideshow, you can preview the effect by clicking “**Play**” button. If you are not satisfied with it, go back to make changes. Or else, go to next step.

Step 7. Save and Share the photo slideshow

Click “**Share**” icon, you can save and share the slideshow. You can save it as a video to your Mac computer, or upload it to YouTube and Facebook directly for sharing.

To play the slideshow on your HDTV , you can copy the video outputted to a USB drive, then plug the USB drive into your HDTV USB port to play the slideshow.
