

## How to add DVD menu for DVD slideshow

Make your favorite photos and songs into a slideshow and then burn it into DVD is very simple. Slideshow DVD Creator can help you create a professional-looking slideshow within minutes. Drag & Drop your songs and images directly into the software, then add transition effect, theme, text or others you want to be shown on the photos by just clicking the icons, then you can have your own slideshow.

Before burning it into DVD, you can also add a DVD title, Menu or even background music for your DVD slideshow. Let's see how to do it.

Of course, you have to download and install the [Slideshow DVD Creator](http://slideshowdvdcreator.com) software. Although it is shareware, but the download is free. And because the only difference between the full and the trial version is the limitation on photo number. You can have a full trial before purchasing the software.

The Website is : <http://slideshowdvdcreator.com> .

After you install the Slideshow DVD Creator, you can see the software screenshot as below. In the left panel, it has "**Images, Music, Theme, DVD menu, options**" for you. First you can add the photos and songs you liked to the software.

Welcome screen:

Add photos:

Add songs:

Now you can have a simple slideshow with background music. Then you can select **transition effect** for each photos. Of course, you can apply the same effect to all the photos as well. The transition effect will help show photos in different ways. Just click the icon between the photos.

So far, you can click the play button below the preview box to play your slideshow. Then you can adjust it according to your needs.

In many conditions, you may like the song and the photos and end at the same time. Slideshow DVD Creator also has the "Sync the images and music" function. Click the "Options", then go to "Music" tab. By clicking the "**Sync Music & Slideshow**", you can have them synchronized.

Until now, you already have a stunning slideshow. Then you can set the DVD menu for your DVD now. Click the "DVD Menu" in the left panel, there pops up the DVD menu dialogue. You can enter **DVD title and subtitle**. And select Theme from "**DVD Menu Theme**". Also you can add **background music** for the DVD as below:

Last, set **DVD video Aspect** and **TV system** as below. Then you can insert the DVD disc into your computer, and click "**Burn DVD**" to make your own DVD.
